The author has determined in an earlier McFarland book (The Historic King Arthur, 1996, paperback 2007) that there was not a historic King Arthur during the sixth century. However, as listed in The Historia Brittonum, there was a “great king of all the kings of Britain” named Ambrosius Aurelianus who was conflated with a heroic Arthur of the second century, and hence with the legendary King Arthur. To further authenticate the Celtic/Romano “King Arthur,”—that is, Ambrosius—the author here examines seven major historical figures of the period A.D. 383–500 based upon the Genealogical Preface of The Anglo-Saxon Chronicle and the emendation of dates in that chronicle. Those seven allies and adversaries are Vortigern, Vortimer, Vitalinus, Cunedda, Cerdic, Octha, and Mordred. Through an extensive analysis of Arthur’s 12 battles listed in the Historia Brittonum, this work explores both the influences of the High King’s allies, and the shifting allegiances of his enemies. A battle list provides possible geographic locations for each of the battles, including a new site for Arthur’s fateful battle at Camlann.

In this the second part of his four-volume military and political history of the Anglo-Saxon kingdom, Paul Hill follows the careers of Æthelflæd, Alfred the Great’s eldest daughter, and Edward the Elder, Alfred’s eldest son, as they campaigned to expand their rule after Alfred’s death. They faced, as Alfred had done, the full force of Danish hostility during the early years of the tenth century, a period of unrelenting turbulence and open warfare. But through their military strength, in particular their strategy of fortress building, they retained their hold on the kingdom and conquered lands which had been under Danish lords for generations. Æthelflæd’s forces captured Derby and Leicester by both force and diplomacy. Edward’s power was always immense. How each of them used forts (burhs) to hold territory, is explored. Fortifications across central England became key. These included Bridgnorth, Tamworth, Stafford, Warwick, Chirbury and Runcorn (Æthelflæd) and also Hertford, Witham, Buckingham, Bedford and Maldon (Edward), to name a few. Paul Hill’s absorbing narrative incorporates the latest theories and evidence for the military organization and capabilities of the Anglo-Saxons and their Danish adversaries. His book gives the reader a detailed and dramatic insight into a very sophisticated Anglo-Saxon kingdom.

Few accounts of ancient warfare have looked at how the weapons were made and how they were actually used in combat. Logan Thompson’s pioneering survey traces the evolution of weapons in Britain across 3000 years, from the Bronze Age to the Battle of Hastings in 1066. Insights gained from painstaking practical research and technical analysis shed new light on the materials used, the processes of manufacture, the development of the weapons and their effectiveness. His account features new information about the weapons themselves, their origin and design, and it offers a fascinating new perspective on the practice of early warfare.
