This Beginner Course from the "28 SAT Math Lessons" series gives you all of Dr. Steve Warner's unique tips, tricks and tactics that he has developed over the last 14 years to get even the lowest scoring math students up to a 600 in SAT math. Dr. Warner has used his Ph.D. in mathematics to create the ultimate system for generating huge score increases in SAT math with only 20 minutes of preparation each day. The material in this book consists of Dr. Warner's exclusive strategies that students usually pay \$375 per meeting to access during private tutoring sessions. The unique techniques Dr. Warner teaches, now available in his "Get 800" collection of books, are the most effective ever published and cannot be found in any other SAT prep book! Be careful! Some of Dr. Warner's students have shown such significant score increases that the College Board has accused them of cheating with no evidence besides their score increase from one SAT to the next. If you feel that this may happen to you after using one of Dr. Warner's books please contact him before taking your next SAT and he will tell you how to protect yourself. Beware of other books on the market that claim to be as good as Dr. Warner's. No book can be as effective as this one unless it targets students in a specific score range. Other tutors and authors, while very intelligent, often make a mistake by teaching every student how to solve problems in the same way. They do not understand the philosophy of the test and do not always know how to translate their own genius into points which would fit a specific student's needs depending on his/her math level. The "28 SAT Math Lessons" three book series is perfect for your SAT math prep for 5 reasons: 1. Each of the 3 books in the series (Beginner, Intermediate and Advanced) targets students within a specific score range. The targeted nature of these books allows you to choose a course that is a perfect fit for you. This means that you will not waste any time practicing problems that you do not need help with. The Beginner Course is perfect if you are currently scoring below 500 on College Board practice tests. 2. Dr. Warner has had to teach SAT math prep for 14 years to accumulate the powerful combination of insights and strategies found in this book. Years of experience and a unique approach have led to the ultimate product that outdoes any other SAT prep book. While other books teach general mathematical knowledge, Dr. Warner's strategies are designed to exploit the test's weaknesses, which allow students to save huge amounts of time, avoid careless mistakes, and answer questions correctly without any messy algebraic computations. 3. Dr. Warner understands just how frustrating it can be for a student with a weak mathematical background to study for SAT math. The lessons in this book were designed to build confidence while simultaneously increasing mathematical skill level so that even if you have hated math your whole life, you will no longer dread your SAT math study sessions. The information in the introduction alone is enough to raise your SAT math score up to 50 points before you even attempt one math problem. 4. There are over 250 SAT math problems to practice with. The book naturally progresses from easier to harder problems. It starts with Level 1 and 2 problems, and then slowly focuses more on Level 2 and 3 problems as the book goes on. Explanations of the solutions are so thorough and comprehensible that even second language speakers can easily follow them. 5. The course is designed to ensure that students are preparing in the most efficient way possible just by reading the book from cover to cover. No choices ever have to be made. The author has ensured that good preparation happens automatically with no effort on the reader's part.

This Advanced Course from the "28 SAT Math Lessons" series, for the revised SAT beginning March 2016, gives you all of Dr. Steve Warner's unique tips, tricks and tactics that he has developed over the last 15+ years to get his strongest students from a 600 to an 800 in SAT math. The targeted nature of these books allows you to choose a course that is a perfect fit for you. This means that you will not waste any time practicing problems that you do not need help with. The Advanced Course is perfect if you are currently scoring 600 or higher on College Board practice tests and are aiming for a perfect 800. 2. Dr. Warner has had to teach SAT math prep for 14 years to accumulate the powerful combination of insights and strategies found in this book. Years of experience and a unique approach have led to the ultimate product that outdoes any other SAT prep book. While other books teach general mathematical knowledge, Dr. Warner's strategies are designed to exploit the test's weaknesses, which allow students to save huge amounts of time, avoid careless mistakes, and answer questions correctly without any messy algebraic computations 3. The lessons will naturally increase your mathematical maturity so that your potential score increases simultaneously with your actual score. This means that you can actually become capable of getting an 800 even if you were not before picking up the book. The information in the introduction alone is enough to raise your SAT math score up to 50 points before you even attempt one math problem 4. There are over 300 SAT math problems to practice with, most of which are Level 4 and 5. Explanations of the solutions are so thorough and comprehensible that even second language speakers can easily follow them. 5. The course is designed to ensure that students are preparing in the most efficient way possible just by reading the book from cover to cover. No choices ever have to be made. The author has ensured that good preparation happens automatically with no effort on the reader's part.

"The 32 Most Effective SAT Math Strategies" gives you the most effective tips, tricks and tactics from Dr. Steve Warner, a Math Professor and SAT math tutor whose students pay him \$375 per session to access these exclusive strategies and powerful teaching methods. The unique techniques Dr. Warner teaches, now available in his "Get 800" collection of books, are the most effective ever published and cannot be found in any other SAT prep book! The material in this book includes: 32 of the most effective SAT math strategies ever published 115 problems with solutions demonstrating how to use each strategy properly several different solutions for most solved problems Be careful! Some of Dr. Warner's students have shown such significant score increases that the test makers have accused them of cheating with no evidence besides their score increase from one SAT to the next. If you feel that this may happen to you after using this book please contact Dr. Warner before taking your next SAT and he will tell you how to protect yourself. Beware of other books on the market that claim to be as good as Dr. Warner's. Other tutors and authors, while very intelligent, often make a mistake by teaching every student how to solve problems in the same way. They do not understand the philosophy of the test and do not always know how to translate their own genius into points which would fit a specific student's needs depending on his/her math level. "The 32 Most Effective SAT Math Strategies" is perfect for your SAT math prep for 5 reasons: 1. Dr. Warner realizes that every student learns differently and this is one of the reasons that many problems are solved in several different ways using different strategies. Every student will be able to find a solution that is a perfect fit for him/her. More advanced students will especially benefit from Dr. Warner's approach of providing multiple solutions by helping them develop many methods to solve new problems, and to give deeper insight into the problems themselves so that those problems can be solved more quickly, more easily, and with no chance of making careless errors. 2. There are 115 SAT math problems to practice with split into 5 levels and distributed among the 4 general topic areas covered on the test. Explanations of the solutions are so thorough and comprehensible that even second language speakers can easily follow them. 3. The book is designed to generate huge SAT score increases with only 20 minutes of math preparation each day. By arranging the problems by strategy, you can easily find the techniques that you need the most practice with. The level and topic of each question is clearly indicated so you can pick out the problems that you need to focus on to raise your score without wasting time on problems that are too easy or too difficult for you. 4. Dr. Warner's teaching methods will naturally increase your mathematical maturity so that your potential score increases simultaneously with your actual score. This means that you can actually become capable of getting an 800 even if you were not before picking up the book. The information in the introduction alone is enough to raise your SAT math score up to 50 points before you even attempt one math problem. 5. Dr. Warner has had to teach SAT prep for 14 years to accumulate the powerful combination of insights and strategies found in this book. Years of experience, a Ph.D. in math, and a unique approach have led to the ultimate product that outdoes any other SAT prep book. While other books teach general mathematical knowledge, Dr. Warner's strategies are designed to exploit the test's weaknesses, which allow students to save huge amounts of time, avoid careless mistakes, and answer questions correctly while avoiding messy algebraic computations whenever possible.

The lessons in this book have been constructed to provide you with efficient ways of solving problems while spending less on on each question.
