Chapter 10  
Biology Cell Growth

Answer Key  
And Division Chapter

Chapter Review. The

life of cell consists of stages that make up the cell cycle. After a cell is born, it passes through an interphase before it is ready to replicate itself and produce daughter cells. This interphase

# Read PDF Cell Growth And

includes two gap phases (G1 and G2), as well as an S phase, during which its DNA is replicated in preparation for cell division.

## 3.5 Cell Growth and Division □ Anatomy & Physiology

The two major phases of the cell cycle include mitosis (cell

# Read PDF Cell Growth And

division), and interphase, when the cell grows and performs all of its normal functions.

Interphase is further subdivided into G<sub>1</sub>, S, and G<sub>2</sub> phases. After the synthesis phase, the cell proceeds through the G<sub>2</sub> phase.
