specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

In a tense and riveting narrative, *The ISIS Hostage* details freelance photographer Daniel Rye's 13-month ordeal at the hands of the Islamic State after he was captured in Syria, and the misery inflicted upon him, and 19 other hostages, by their guards. This compelling account also follows Daniel's family and the nerve-wracking negotiations with his kidnappers. It traces their horrifying journey through impossible dilemmas, and offers a rare glimpse into the secret world of the investigation launched to locate and free not only Daniel, but also the American freelance journalist and fellow hostage James Foley. Written with Daniel's full cooperation and based on interviews with former fellow prisoners, jihadists, and key

the influence of e-mobility on the daily mobility behavior, the effects on the automotive supply chain and the impact on industrial production have to be taken into account. According to these complex aspects it is crucial to not only acquire specific knowledge in the particular fields but also to consider their functional interaction. Therefore, it seems essential to merge competence from science, economy and politics. This year, the annual „Conference on Future Automotive Technology“ as the follow-up of the „2. Automobiltechnisches Kolloquium München“ focuses on the economical realization of widespread automotive electromobility.

The Big Book of Tiny Cars presents entertaining profiles of automotive history's most famous—and infamous—microcars and subcompacts from 1901 to today. Illustrated with photos and period ads.

We have been trying to make cars cleaner and more efficient, but has this really made them more sustainable? This book argues, within the context of sustainable consumption and production, that we should see the car as a natural system, subject to natu

This book is about how societies around the world can accelerate innovation in sustainable transport. It examines the relationship between policy change and the development of technological innovations in low carbon vehicle technologies, including biofuels, hybrid-electric vehicles, electric vehicles and fuel cells. Examining this relationship across countries and regions that are leaders in vehicle manufacturing and innovation, such as the European Union, Germany, Sweden, China, Japan, Korea and USA, the books aims to learn lessons about policy and innovation performance.
