One of the most significant industrial states in the country, with a powerful radical tradition, Pennsylvania was, by the early 1950s, the scene of some of the fiercest anti-Communist activism in the United States. Philip Jenkins examines the political and social impact of the Cold War across the state, tracing the Red Scare's reverberations in party politics, the labor movement, ethnic organizations, schools and universities, and religious organizations. Among Jenkins's most provocative findings is the revelation that, although their absolute numbers were not large, Communists were very well positioned in crucial Pennsylvania regions and constituencies, particularly in labor unions, the educational system, and major ethnic organizations. Instead of focusing on Pennsylvania's right-wing politicians (the sort represented nationally by Senator Joseph McCarthy), Jenkins emphasizes the anti-Communist activities of liberal politicians, labor

leaders, and ethnic community figures who were terrified of Communist encroachments on their respective power bases. He also stresses the deep roots of the state's militant anti-Communism, which can be traced back at least into the 1930s.

The author examines the culture of the United States in the post- World War II era with its air raid drills, spy trials, anti-Communist activity, and TV quiz show scandals.

Rothwell, der har undervist i nyere historie ved University of Edinburgh siden 1970, skriver på grundlag af Foreign Office's arkiver i Public Record Office om Storbritanniens udenrigspolitik 1941-47, specielt forholdet til Sovjet og USA

Horror films provide a guide to many of the sociological fears of the Cold War era. In an age when warning audiences of impending death was the order of the day for popular nonfiction, horror films provided an area where this fear could be lived out to its ghastly conclusion. Because enemies and potential situations of fear lurked everywhere, within the home, the government, the family, and the very self, horror films could speak to the invasive fears of the cold war era. I Was a Cold War Monster examines cold war anxieties as they were reflected in British and American films from the fifties through the early sixties. This study examines how cold war horror films combined anxiety over social change with the erotic in such films as Psycho, The Tingler, The Horror of Dracula, and House of Wax.

After 1949, the British Empire in Hong Kong was more vulnerable than the lack of Chinese demand for return and the success of Hong Kong's economic transformations might have suggested. Its vulnerability stemmed as much from

Britain's imperial decline and America's Cold War requirements as from a Chinese threat. It culminated in the little known '1957 Question', a year when the British position in Hong Kong appeared more uncertain than any time since 1949. This is the first scholarly study that places Hong Kong at the heart of the Anglo-American relationship in the wider context of the Cold War in Asia. Unlike existing works, which tend to treat British and US policies in isolation, this book explores their dynamic interactions - how the two allies perceived, responded to, and attempted to influence each other's policies and actions. It also provides a major reinterpretation of Hong Kong's involvement in the containment of China. Dr Mark argues that, concerned about possible Chinese retaliation, the British insisted and the Americans accepted that Hong Kong's role should be as discreet and non-confrontational in nature as possible. Above all, top decision-makers in Washington evaluated Hong Kong's significance not in its own right, but in the context of the Anglo-American relationship: Hong Kong was seen primarily as a bargaining chip to obtain British support for US policy elsewhere in Asia. By using a variety of British and US archival material as well as Chinese sources, Dr Mark examines how the British and US government discussed, debated, and disagreed over Hong Kong's role in the Cold War, and reveals the dynamics of the Anglo-American alliance and the dilemmas of small allies in a global conflict.

From President Truman's use of a domestic propaganda agency to Ronald Reagan's handling of the Soviet Union during his 1984 reelection campaign, the American political system has consistently exerted a profound effect on the country's foreign policies. Americans may cling to the belief that "politics stops at the water's edge," but the reality is that parochial political interests often play a critical role in shaping

the nation's interactions with the outside world. In *The Cold War at Home and Abroad: Domestic Politics and US Foreign Policy since 1945*, editors Andrew L. Johns and Mitchell B. Lerner bring together eleven essays that reflect the growing methodological diversity that has transformed the field of diplomatic history over the past twenty years. The contributors examine a spectrum of diverse domestic factors ranging from traditional issues like elections and Congressional influence to less frequently studied factors like the role of religion and regionalism, and trace their influence on the history of US foreign relations since 1945. In doing so, they highlight influences and ideas that expand our understanding of the history of American foreign relations, and provide guidance and direction for both contemporary observers and those who shape the United States' role in the world. This expansive volume contains many lessons for politicians, policy makers, and engaged citizens as they struggle to implement a cohesive international strategy in the face of hyper-partisanship at home and uncertainty abroad.

Organized around the office of the president, this study focuses on American behavior at home and abroad from the Great Depression to the onset of the end of the Cold War, two key points during which America sought a re-definition of its proper relationship to the world. Domestically, American society continued the process of industrialization and urbanization that had begun in the 19th century. Urban growth accompanied industrialism, and more and more Americans lived in cities. Because of industrial growth and the consequent interest in foreign markets, the United States became a major world power. American actions as a nation, whether as positive attempts to mold events abroad or as negative efforts to enjoy material abundance in relative political isolation, could not help but affect the course of world

history. Under President Hoover, the federal government was still a comparatively small enterprise; challenges of the next six decades would transform it almost beyond belief, touching in one way or another almost every facet of American life. Before the New Deal, few Americans expected the government to do anything for them. By the end of the Second World War and in the aftermath of the Great Depression, however, Americans had turned to Washington for help. Even the popular Reagan presidency of the 1980s, the most conservative since Hoover, would fail to undo the basic New Deal commitment to assist struggling Americans. There would be no turning back the clock, at home or abroad.
