Computerised Accounting using MYOB® AccountRight 2016.2 (Student Edition) provides learners with clear, logical instructions in order for them to competently set up and apply MYOB® accounting software. This edition has a revised text, revamped by a fresh author team and technically reviewed by an independent consultant to ensure its currency, accuracy and relevance. Introduce your students to real-world applications and the requirements of the unit of competency.

This book is suitable for those preparing for the examinations of ICB, AAT, IAB, OCR, AQA and all other courses in computerised accounting. Learning computerised book-keeping skills is very different from manual accounting. It can seem more like learning computer studies than book-keeping, and it is often difficult to connect it with what may have been previously learned in manual book-keeping. In this book Dr Marshall resolves this problem with the same skill and insight that made his book on manual book-keeping, Mastering Book-keeping, so useful to readers over the years. Deliberately constructing a clear and continuous bridge between the methods so that the student never loses sight of the double entry concept, he presents the material in a way that makes computerised book-keeping clear and easy to understand.

This bestselling text provides instruction on how to record, edit, interpret and analyse financial data using manual and computerised bookkeeping systems. Includes three different company accounts for a total of six monthly periods in the source document booklet. The same data is used in both the manual and computerised sections, facilitating comparison of results. Illustrates the basic principles and entries of bookkeeping in two sections: SECTION 1: Manual Bookkeeping Explains how to identify source documents and make entries in the appropriate daybooks. Details the process and importance of cross-checking. Works through the transfer of entries into the various ledgers and explains how to produce a Trial Balance. Illustrates the process of bank reconciliation and the production of a VAT 3 form. SECTION 2: Computerised Bookkeeping Relates specifically to the TASBooks package, but can be easily adapted to suit other bookkeeping accounts packages. Screen shots throughout provide step-by-step instructions on how to install the TASBooks program, clear down the data and set up new companies, customers, suppliers, nominal accounts and products. Explains how to produce reports and compare these to the manual daybooks and ledgers. Includes a sample project and exam, complete with solutions and marking schemes. WRITTEN FOR Students of FETAC level 5 Bookkeeping - Manual & Computerised module.

This book is suitable for those preparing for the examinations of ICB, AAT, IAB, OCR, AQA and all other courses in computerised accounting. Learning computerised book-keeping skills is very different from manual accounting. It can seem more like learning computer studies than book-keeping, and it is often difficult to connect it with what may have been previously learned in manual book-keeping. In this book Dr Marshall resolves this problem with the same skill and insight that made his book on manual book-keeping, Mastering Book-keeping, so useful to readers over the years. Deliberately constructing a clear and continuous bridge between the methods so that the student never loses sight of the double entry concept, he presents the material in a way that makes computerised book-keeping clear and easy to understand.

The fast and easy way to master the art of bookkeeping If you're a business owner or an employee who manages finances, the latest edition of Bookkeeping For Dummies is for you. This handy guide gives you clear and concise information on how to keep track of accounts, prepare balance sheets, organize ledgers or journals, create financial statements, and so much more.
