Medical anthropology is the research area within cultural anthropology that marries concepts from biological and cultural anthropology to better understand health and disease among humans. It is one of the fastest growing research areas within anthropology. Some would classify it as part of applied anthropology, the fifth (often overlooked) anthropological sub-discipline.

Using a cultural materialist approach, the sixth edition of Cultural Anthropology furnishes readers with a framework for explaining how the parts of sociocultural systems are interrelated and how they change over time. Described as accessible, engaging well illustrated and comprehensive, this book covers a wide range of Western and nonwestern cultures for analysis and comparison. "Marvin Harris can continue to bring new insights to the field of anthropology and provide ways to inspire readers new to this discipline," writes a long-time user. For anyone interested in learning about cultural anthropology.

Anthropology in today's world. Through clear writing, a balanced theoretical approach, and engaging examples, Cultural Anthropology stresses the importance of social inequality and human rights, the environment, culture change and applied aspects of anthropology. Rich examples of gender, ethnicity, race, class, and age thread through the topical coverage of economic systems, the life-cycle, health, kinship, social organization, politics, language, religion, and expressive culture. In addition, the last two chapters address how migration is changing world cultures and how the importance of local cultural values and needs are shaping international development policies and programs. Covering the essential concepts that drive cultural anthropology today, Ken Guest's Cultural Anthropology: A Toolkit for a Global Age shows students that now, more than ever, global forces affect local culture and that the tools of cultural anthropology are essential to living in a global society. A "toolkit" approach encourages students to pay attention to big questions raised by anthropologists, offers study tools to remind readers what concepts are important, and shows them why it all matters in the real world.

Ideal for any cultural anthropology course, this brief collection of ethnographic case studies exposes students to 15 different cultures. The groups selected are peoples whose traditional cultures are uniquely their own. Each has distinctive patterns and practices; each has faced the challenge of an encroaching

world, with differing results. Moreover, they often provide the prime illustrations of important concepts in introductory anthropology course including Azande witchcraft, Ju/hoansi egalitarianism, Trobriand kula exchange, and Minangkabau matriliney. As such, this volume can stand alone as an introduction to central ethnographic concepts through these 15 societies, or serve as a valuable companion to anthropology texts. Many of the peoples presented are involved in the diaspora; some struggle to preserve old ways in new places. All sketches follow a logical, consistent organization that makes it easy for students to understand major themes such as history, subsistence, sociopolitical organization, belief systems, marriage, kinship, and contemporary issues.

Cultural Anthropology provides students with the anthropological tools to question and understand their own culture and the world. Key updates for the sixth edition include a shorter length and more streamlined focus, China and Hindu South Asia combined into a single chapter, a new chapter assessing imperialism and the breakdown of states, and more.
