## PETE-301: RESERVOIR

Through pedagogical narratives, literary analyses, reflective essays, and collaborative dialogues, *Narratives of Educating for Sustainability in Unsustainable Environments* explores the professional and intellectual tensions of curricula, pedagogies, and personal practices that honor the relationships of interspecies ecologies, reinhabit and reconceive wounded landscapes and wounding institutions, and allow us to reattune ourselves to new yet ancient frameworks for sustainability. For the writers here, fostering sustainability in higher education means focusing on place, creating positive relationships with humans and other beings, and creating administrative structures that will maintain new approaches for the long-term, showing how teaching environmentally is at once intensely site-specific yet powerfully global, deeply personal yet visibly public. *Narratives of Educating for Sustainability in Unsustainable Environments* confronts the contexts that make environmental pedagogies difficult, the challenges to the well-being of the teacher-scholar, and the corrosive academic structures that compartmentalize knowledge and people. The collection simultaneously offers models for working through and within these challenges to advance understandings and ways of being on local, global, and personal levels that will turn the planetary tide toward effective and shared sustainability.

As the magazine of the Texas Exes, The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years. The Alcalde serves as an intellectual crossroads where UT's luminaries - artists, engineers, executives, musicians, attorneys, journalists, lawmakers, and professors among them - meet bimonthly to exchange ideas. Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater. The magazine's unique name is Spanish for "mayor" or "chief magistrate"; the nickname of the governor who signed UT into existence was "The Old Alcalde."

This comprehensive book focuses squarely on academic portfolios, which may prove to be the most innovative and

promising faculty evaluation and development technique in years. The authors identify key issues, red flag warnings, and benchmarks for success, describing the what, why, and how of developing academic portfolios. The book includes an extensively tested step-by-step approach to creating portfolios and lists 21 possible portfolio items covering teaching, research/scholarship, and service from which faculty can choose the ones most relevant to them. The thrust of this book is unique: It provides time-tested strategies and proven advice for getting started with portfolios. It includes a research-based rubric grounded in input from 200 faculty members and department chairs from across disciplines and institutions. It examines specific guiding questions to consider when preparing every subsection of the portfolio. It presents 18 portfolio models from 16 different academic disciplines. Designed for faculty members, department chairs, deans, and members of promotion and tenure committees, all of whom are essential partners in developing successful academic portfolio programs, the book will also be useful to graduate students, especially those planning careers as faculty members.
