*Diller Scofidio + Renfro*

Lincoln Center has become an icon inextricably linked with New York. The redesign of public spaces includes the Central Plaza, the North Plaza, the conversion of 65th Street from a service corridor into a new central spine, the transformation of three blocks of Lincoln Center's frontage at Columbus Avenue and eventually, Damrosch Park. The redesign is intended to turn the campus inside out ...

The book, "traces the creation, from conception to realization, of a media pavilion for the Swiss Expo.02 whose primary materials are steel and fog."

In *Diller Scofidio + Renfro: Architecture after Images*, Edward Dimendberg offers the first comprehensive treatment of one of the most imaginative contemporary design studios. Since founding their practice in 1979, Elizabeth Diller and Ricardo Scofidio have integrated architecture, urban design, media art, and the performing arts in a dazzling array of projects, which include performances, art installations, and books, in addition to buildings and public spaces. At the center of this work is a fascination with vision and a commitment to questioning the certainty and security long associated with architecture. Dimendberg provides an extensive overview of these concerns and the history of the studio, revealing how principals Elizabeth Diller, Ricardo Scofidio, and Charles Renfro continue to expand the definition of architecture, question the nature of space and vision in contemporary culture, and produce work that is endlessly surprising and rewarding, from New York's High Line to *Blur*, an artificial cloud, and *Facsimile*, a video screen that moves around a building facade. Dimendberg also explores the relation of work by DS+R to that by earlier modernists such as Marcel Duchamp and John Hejduk. He reveals how the fascination of the architects with evolving forms of media, technology, and building materials has produced works that unsettle distinctions among architecture and other media. Based on interviews with the architects, their clients, and collaborators as well as unprecedented access to unpublished documents, sketchbook entries, and archival records, *Diller Scofidio + Renfro* is the most thorough consideration of DS+R in any language. Illustrated with many previously unpublished renderings in addition to photos from significant contemporary photographers, this book is an essential study of one of the most significant and creative architecture and design studios working today.

When Reynold Levy became the new president of Lincoln Center in 2002, *New York Magazine* described the situation he walked in to as "a community in deep distress, riven by conflict." Ideas for the redevelopment of Lincoln Center's artistic facilities and public spaces required spending more than 1.2 billion, but there was no clear pathway for how to raise that kind of unprecedented sum. The individual resident organizations that were the key constituents of Lincoln Center -- the Metropolitan Opera, the New York City Opera, the New York Philharmonic, the Juilliard School, and eight others -- could not agree on a common capital plan or fundraising course of action. Instead, intramural rivalries and disputes filled the vacuum. Besides, some of those organizations had daunting problems of their own. Levy tells the inside story of the demise of the New York City Opera, the Metropolitan Opera's need to use as collateral its iconic Chagall tapestries in the face of mounting operating losses, and the New York Philharmonic's dalliance with Carnegie Hall. Yet despite these and other challenges, Levy and the extraordinary civic leaders at his side were able to shape a consensus for the physical modernization of the sixteen-acre campus and raise the money necessary to maintain Lincoln Center as the country's most vibrant performing arts destination. By the time he left, Lincoln Center had prepared itself fully for the next generation of artists and audiences. *They Told Me Not to Take That Job* is more than a memoir of life at the heart of one of the world's most prominent cultural institutions. It is also a case study of leadership and management in action. How Levy and his colleagues triumphantly steered Lincoln Center -- through perhaps the most tumultuous decade of its history to a startling transformation -- is fully captured in his riveting account.

Victoria Newhouse, noted author and architectural historian, addresses the aesthetics and acoustics in concert halls and opera houses of the past, present, and future in this stunning companion to the highly regarded *Towards a New Museum. Site and Sound* explores the daunting, perennial question: Does the music serve the space, or the other way around? Heavily illustrated throughout—with historic images, spectacular color photographs, detailed drawings—this volume is an informed and enjoyable presentation of a building type that is at the heart of cities small and large. Newhouse starts with a survey of venues from ancient Greek and Roman times and progresses to contemporary works around the world. She singles out Lincoln Center in particular for its long history and its transitions and remodelings over the years. Two major chapters cover the present: one focuses on recent work in the West, including the National Opera House of Norway in Oslo by Sneheta (2008), the Casa da Música in Porto, Portugal, by Rem Koolhaas (2005), and many more; the second examines the boom in concert halls in China. A final chapter looks at projects that are currently planned and the future of an architecture for music.

Like all the work of architects Liz Diller + Ric Scofidio, *Flesh* is a set of contradictions and complexities. It's both a monograph of their work—the first ever on their art, architecture, and installations—but also not a traditional monograph. It is a both/and, neither/nor book-as-project noted at the time of its publication, in 1994, for its groundbreaking typography and not-too-subtle critique of architecture from within. Since its publication, *Diller + Scofidio* (now *Diller Scofidio + Renfro*) have gone on to become among the world's most famous architects, but the themes, concerns, and even forms that make them so celebrated today are all here in *Flesh*, along with its most radical proposition: that anything can be architecture, starting with this book, one of the most sought-after and valuable books in our library.

A senior photography introduces a young man to the intricacies of photography. 'If,' he says, 'I try to imagine the lives going on in all these houses, the domestic dramas, the family sagas, it seems impossibly complicated. How could you ever do justice to something so rich in detail? You couldn't do it in a novel, let alone a photograph.' The novel follows the young man's broken path, as he goes overseas, finds a career, and then comes back to a changed Johannesburg. In the process, the book develops an ever-widening perspective not only on change in the country, but also on questions to do with seeing and being seen. It brings into sharp focus South Africa's recent history and the difficulty of depicting it. *Double Negative* was first published in November 2010 in *TJ/Double Negative* as the fictional companion to David Goldblatt's book of Johannesburg photographs titled *TJ*

Extraordinary architecture addresses so much more than mere practical considerations. It inspires and provokes while creating a seamless experience of the physical world for its users. It is the rare writer that can frame the discussion of a building in a way that allows the reader to see it with new eyes. *Writing About Architecture* is a handbook on writing effectively and critically about buildings and cities. Each chapter opens with a reprint of a significant essay written by a renowned architecture critic, followed by a close reading and discussion of the writer's strategies. Lange offers her own analysis using contemporary examples as well as a checklist of questions at the end of each chapter to help guide the writer. This important addition to the *Architecture Briefs* series is based on the author's design writing courses at New York University and the School of Visual Arts. Lange also writes a popular online column for *Design Observer* and has written for *Dwell*, *Metropolis*, *New York Magazine*, and *The New York Times*. *Writing About Architecture* includes analysis of critical writings by Ada Louise Huxtable, Lewis Mumford, Herbert Muschamp, Michael Sorkin, Charles Moore, Frederick Law Olmsted, and Jane Jacobs. Architects covered include Marcel Breuer, Diller Scofidio + Renfro, Field Operations, Norman Foster, Frank Gehry, Frederick Law Olmsted, SOM, Louis Sullivan, and Frank Lloyd Wright.

Following on the success of *Never Built: Los Angeles* (Metropolis Books, 2013), authors Greg Goldin and Sam Lubell now turn their eye to New York City. New York towers among world capitals, but the city we know might have reached even more stellar heights, or burrowed into more destructive depths, had the ideas pictured in the minds of its greatest dreamers progressed beyond the drawing board and taken form in stone, steel, and glass. What is wonderfully elegant and grand might easily have been ingloriously grandiose; what is blandly unremarkable, equally, might have become delightfully provocative or humanely inspiring. The ambitious schemes gathered here tell the story of a different skyline and a different sidewalk alike. Nearly 200 ambitious proposals spanning 200 years encompass bridges, skyscrapers, master plans, parks, transit schemes, amusements, airports, plans to fill in rivers and extend Manhattan, and much, much more. Included are alternate visions for such landmarks as Central Park, Columbus Circle, Lincoln Center, MoMA, the U.N., Grand Central Station and the World Trade Centre site, among many others sites. Fact-filled and entertaining texts, as well as sketches, renderings, prints, and models drawn from archives all across the New York metropolitan region tell stories of a new New York, one that surely would have changed the way we inhabit and move through the city.

A revealing look at the visionary French furniture designer and architect, highlighting his virtuoso designs and versatile creativity The designer and architect Pierre Chareau (1883-1950) was a pivotal figure in modernism. His extraordinary Art Deco furniture is avidly collected and his visionary glass house, the *Maison de Verre*, is celebrated, but the breadth of his design genius has been little explored. Chareau linked architecture, fine arts, and style; designed furniture for avant-garde films and chic homes; collected artists such as Picasso and Mondrian; and was a radical innovator in the use of materials. Essays by leading scholars embrace the full scope of his invention, offering detailed analyses of individual projects, the interdisciplinary nature of his work, his Jewish background, his place in the avant-garde of Paris between the wars, and his more recent reception. Extensive illustrations present a rich sampling of Chareau's furniture, architecture, interiors, fabrics, and wallpapers, as well as his own important art collection."
