This casebook focuses on the large issues of doctrine, theory, and policy that disability rights law raises in employment, government services, public accommodations, health care, housing, and education. This book focuses less on identifying "the rules" of disability rights law and more on exploring the big questions through longer excerpts from a smaller number of cases. It includes textual notes examining key theoretical and policy questions. New edition includes updated discussion of the ADA AAA and new EEOC and DOJ regulations, deinstitutionalization litigation, standing and pleading requirements in public accommodations litigation, the implications of the Affordable Care Act, and other topics.

This casebook is designed to enable students to grapple with the conceptual issues in the area of disability rights law. It covers all of the major issues in disability rights law.

This casebook focuses on the large issues of doctrine, theory, and policy that disability rights law raises in employment, government services, public accommodations, health care, housing, and education. This book focuses less on identifying "the rules" of disability rights law and more on exploring the big questions through longer excerpts from a smaller number of cases. It includes textual notes examining key theoretical and policy questions. New edition includes updated discussion of the ADA AAA and deinstitutionalization litigation, expanded treatment of disability rights in education, and extensive discussion of the disability rights implications of COVID-19 throughout, among other topics.

This casebook examines the development of disability rights law and policy in the United States and abroad and can be used as either a law or graduate school teaching tool. It gives a complete and current treatment of the Americans with Disabilities Act and the ADA Amendments Act, including the background of the statute's passage, definition of disability, discrimination in employment, public services, and public accommodations. It also gives in-depth coverage of other important federal disability discrimination statutes like the Individuals with Disabilities Education Act, Rehabilitation Act, and Fair Housing Amendments Act. This book is unique in that it offers extensive coverage of the rapidly developing area of international disability law, through discussion of the new UN Convention on Rights of Persons with Disabilities and related developments. The authors also offer detailed coverage of current policy issues involving taxation, health policy, and technology. The book has been streamlined significantly since the last edition.

Disability Law and Policy provides an overview of the major themes and insights in disability law. It is also a compelling compendium of stories about how our legal system has responded to the needs of impacted individuals. Peter Blanck is University Professor & Chairman of the Burton Blatt Institute at Syracuse University. The year 2020 marks the thirtieth anniversary of the Americans with Disabilities Act. During the past three decades, disability law and policy, including the law of the ADA itself, have evolved dramatically in the United States and internationally. Walls of inaccessibility, exclusion, segregation, stigma, and discrimination have been torn down, often brick-by-brick. But the work continues, many times led by advocates who have never known a world without the ADA and are now building on the efforts of those who came before them. Lex Frieden, former Chairperson of the National Council on Disability, writes in the book's Foreword: "In 1967, I survived a head-on car crash. When I woke up, I was paralyzed from the shoulders down. . . . My story is one of many in the modern disability rights movement. In Disability Law and Policy, Peter Blanck retells my story, and the personal experiences of many others living with disabilities, in a master tour of the area. Peter is a world-renowned teacher, researcher, lawyer, and advocate. He has been central to the modern sea change in disability civil rights. . . . Disability Law and Policy should be read by all of us--people with the lived experience of disability and their advocates, parents, family members, and friends."

This 2006 Supplement updates Blanck, Hill, Siegal, and Waterstone's Disability Civil Rights Law and Policy: Cases and Materials.

The purpose of this book is to provide students with an in-depth understanding of the ADA, including the sections governing employment (Title I), public entities (Title II), and public accommodations (Title III). The book focuses on the major components of the ADA, with extensive reference to the implementing regulations and accompanying guidance statements--essential building blocks for a complete understanding of the Act. It also covers a wide range of additional topics, such as education, housing, insurance, and the protection of newborns with disabilities. Because the ADA intersects several other federal statutes, such as the IDEA, the FHAA, and Section 504 of the Rehabilitation Act, cross-references to these and other statutes are frequently provided. A companion book, The Law of Disability Discrimination Handbook: Statutes and Regulatory Guidance, includes reference material relevant to interpreting federal law prohibiting discrimination on the basis of disability. The Handbook includes the statutory language of each of the five Titles of the ADA. In addition, with respect to Titles I, II, and III, the Handbook includes the regulations and interpretive guidance promulgated by the EEOC and the United States DOJ. The Handbook also includes reference material relevant to interpreting Section 504 of the Rehabilitation Act of 1973 and the Fair Housing Act Amendments of 1988, as well as excerpts from the Civil Rights Act of 1991. Further, the Handbook contains the text of the IDEA, the Department of Education Regulations implementing the IDEA, and the Convention on the Rights of Persons with Disabilities.

This pedagogically innovative book is the only law school case book focused on human rights advocacy in the United States. It illuminates a range of both hot topics and persistent theoretical and doctrinal issues while equipping students to thoughtfully engage these tools in their own practice of law. Readings and case studies expose students to the history, tools, and critiques of the U.S. human rights movement and the legal and practical challenges of human rights implementation in the United States. Skills exercises introduce practice-oriented approaches to engaging human rights-based strategies, including practice before international treaty bodies as well as domestic policymakers. Additionally, the appendices offer the text of relevant human rights treaties. Appropriate for introductory and advanced seminars, as well as clinical and other experiential offerings, the materials engage students on a remarkable range of issues, including immigration, rights of indigenous peoples, racially discriminatory policing, and right to housing. Chapters also explore fundamental issues of federalism, sovereignty, judicial review, and legal ethics.

This law school casebook supplement includes international instruments establishing comprehensive human rights obligations, such as the Universal Declaration of Human Rights, the International Covenant on Civil and Political Rights, and the International Covenant on Economic, Social and Cultural Rights, and treaties and declarations addressing specific areas of international human rights law. It includes specialized human rights instruments adopted under the auspices of regional organizations such as the Council of Europe, the Organization of American States, the Organization of African Unity, and the Organization for Security and Co-operation in Europe, and select instruments relating to international courts.
