By his early thirties, Paul

Allen was a world-

famous billionaire-and

that was just the beginning. In 2007 and 2008, Time named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His passion, curiosity, and

combined with the
resources to launch and
support new initiatives-
have literally changed the
world. In 2009 Allen
discovered that he had
lymphoma, lending
urgency to his desire to
share his story for the first
time. In this classic
memoir, Allen explains
how he has solved
problems, what he's

discoveries at the
frontiers of brain science.
With honesty, humor,
and insight, Allen tells the
story of a life of ideas
made real.

Appropriate for all levels of expertise, the book provides the knowledge and tools required to conduct a human error analysis of accidents, regardless of operational setting (i.e. military, commercial, or general aviation). The book contains a complete description of the Human Factors Analysis
