A forensic counselor is an individual trained to work with offenders within the criminal justice system to help them with mental health issues. People within the criminal justice system are more likely to have mental health issues than people within the wider population.

~~How to Become a Forensic Counselor~~

Forensic mental health workers may also work with families to appoint a person who can make decisions for a mentally ill suspect when that suspect is too ill to make such decisions on his or her own. Most forensic mental health experts receive training first in the field of mental health, and then further training in forensics. For example, the average psychiatrist first becomes a doctor, then a psychiatrist, and finally may spend two or three years training in forensic psychiatry.

Forensic Mental Health Professionals have entered the fray of child custody litigation in ways that could not have been predicted even a decade ago. Traditionally engaged as neutral court appointed evaluators or mediators, or as treatment providers for children, parents or families, FMHPs are assuming a range of consulting functions. Services span a wide range, including providing expert testimony on specific content areas; reviewing and critiquing colleague's work product; providing behind the scenes consultation to attorneys, and even help attorneys manage difficult cases and clients. These more recent services raise questions about sound professional practice. This volume tackles these thorny issues head on, and discusses questions how consultants can work creatively and ethically to make a positive contribution in the challenging world of family law. This book was originally published as a special issue of Journal of Child Custody.

Imbued with humility, humanity, and humor, *A Practical Guide to Forensic Mental Health Consultation through Aphorisms and Caveats* equips future and practicing forensic mental health consultants with valuable insights "from the trenches." The book employs pithy observations, conditions, and limitations to the process, as well as covering the challenges and opportunities intrinsic to a forensic mental health consulting practice. The nine chapters of the book follow the flow of the consulting forensic mental health process. The chapters feature a collection of aphorisms and caveats that frame and complement the discussion of each step in the process, from engaging with a potential consultee to preparing an effective report to testifying in court to collecting professional fees. Presented in a succinct and approachable way, the book is designed to help professionals avoid some of the inevitable pitfalls and land mines that might occur in a forensic mental health consulting practice. Brief, valuable, and minimally technical, *A Practical Guide to Forensic Mental Health Consultation through Aphorisms and Caveats* is an ideal resource for new and experienced forensic experts alike.

This is the first book devoted to the use of social media and other internet-derived data in forming forensic clinical opinions of behavior. Designed for mental health practitioners, it outlines the challenges and the benefits of incorporating digital information in forensic assessments. It offers best practice guidelines geared to both criminal and civil psycho-legal questions. Each chapter includes a brief overview of the psycho-legal issues, clinical applications of consulting internet-based data, ethical and legal considerations and real life, de-identified case examples. This book provides guidance to the clinician in an emerging technological environment in which there are few resources, and ensures a more scientific and legally sound practice.

*Counseling Adolescents Competently* is a comprehensive text for students and professionals compiling foundational and emerging skills in the counseling field. Authors Lee A. Underwood, Ph.D. and Frances L.L. Dailey, Ph.D. review extensive interventions ranging from assessment to diagnosis as well as fresh perspectives on working with this often challenging group. Employing clinical case scenarios and profiles that demonstrate key issues, this book helps the counselor-in-training to understand the relevant theories and research around adolescents to better engage in culturally relevant interventions and treatment planning. Key Features Unlike most literature related to behavioral health services for adolescents, this text is crafted specifically for the profession of counseling, yet is applicable for all behavioral

health providers. Case scenarios address critical issues impacting today's adolescents including their characteristics, technology issues, diagnoses and typologies, special needs, and interventions involving treatment planning. Themes that are commonly faced by teens, including trauma, grief, loss, emotional issues, sexual development, and peers are covered. A diverse range of adolescents from both urban and non-urban settings are examined. This book addresses a broad audience that includes students in behavioral health training, counseling, and school programs; the practicing provider; and administrative/clinical supervisors and educators.
