the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

Global Edition. It investigates the institutional characteristics of State-linked and State-owned firms (SIEs & SOEs), in emerging markets using Vietnam as a case study with comparative analysis on China and selected ASEAN countries. In doing so, the book adopts an evidence-based approach to explain the State ' s role as a shareholder in the different aspects of corporate governance, including CEO appointment, board structure and impact of State ownership on business strategy and performance. It highlights the influence of the State as a shareholder by investigating institutional factors consistent with “ path dependence ” theory, which postulates that the initial and underlying structure of an economy influences its performance. In addition, the book presents
