South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is

Grade 12

English and, to a much lesser extent, Afrikaans, but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of

this book is on Exam
procedures for assessing
the academic language
and literacy levels and
needs of students, not in
order to exclude
students from higher
education but rather to
identify those who
would benefit from
further development of
their ability in order to
undertake their degree
studies successfully.

The past ten years in South Africa has seen many changes in education - the creation
