This Handbook offers a critical analysis of the major theoretical and empirical issues in public policy and public administration in China. Investigating methodological, theoretical, and conceptual themes, it provides an insightful reflection on how China is governed.

This book investigates patterns of fragmentation and coherence in the international regulatory architecture of public procurement. In the context of the major international instruments of procurement regulation, the book studies the achievement of social and labour policies, the most controversial and problematic instrumental uses of public procurement practices. This work offers an innovative comparative approach, discussing the ways in which the different international instruments-namely the EU Procurement Directives, the WTO Agreement on Government Procurement, the UNCITRAL Model Law and the World Bank's Procurement Framework-are able to implement labour and social purposes and, at the same time, ensure a regulatory balance with the principles of efficiency and non-discrimination. Scholarly, rigorous and timely, this will be important reading for international trade lawyers and procurement practitioners.

A concise introduction to the basics of open access, describing what it is (and isn't) and showing that it is easy, fast, inexpensive, legal, and

beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary opportunity when we make our work “ open access ” : digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.

In this timely Handbook, over 30 prominent academics, practitioners and regulators from across the globe provide in-depth insights into an area of law that the recent global financial crisis has placed in the spotlight: bank insolvency law. *Research Handbook on Crisis Management in the Banking Sector* discusses the rules that govern a bank insolvency from the perspectives of the various parties that are affected by these rules. Thus, whilst many bank insolvency rules have been enacted only recently and their application is still clouded by a host of uncertainties, this book takes the perspectives of the relevant authorities, of the bank and of the bank ' s counterparties. Providing a comprehensive approach to crisis management in the banking sector, this Handbook will prove a valuable resource for academics, postgraduate students, practitioners and international policymakers.

The Comprehensive Economic and Trade Agreement between the EU and Canada (CETA), proposed Transatlantic Trade and Investment

Partnership between the EU and the US (TTIP), and the plurilateral Trade in Services Agreement (TiSA) between the EU and 22 other States have sparked a great deal of academic and public interest. This edited collection brings together leading experts in the field of international economic law to address the legal complexities of these treaties and provide an explanation of their core principles. In the first two chapters, this book examines changing conceptions of international economic law and the main motivations for negotiating mega-regional agreements. In nine further contributions, international experts examine sectoral issues such as the trade, investment, and dispute settlement procedures envisaged in these 'mega-regional' agreements. The book goes on to consider the progress made in intellectual property protection, the problems associated with data protection, human rights, labour, and environmental standards, issues of transparency and legitimacy, and the relationship between CETA, TTIP, and TiSA on the one hand and EU law on the other. It concludes with four chapters that discuss globalization and other fundamental questions surrounding these mega-regional agreements from economic, political science, and legal perspectives.

Behavioural sciences help refine our understanding of human decision-making. Their insights are immensely relevant for policy-making since public intervention works much better when it targets real people rather than imaginary beings assumed to be perfectly rational. Increasingly, governments around the world are keen to rely on those insights for reshaping public interventions in a wide range of policy areas such as energy, health, financial services and data protection. When policy-making meets behavioural sciences, effective and low-cost regulations can emerge in the form of default rules, smart disclosure and simplification requirements. While behaviourally-informed intervention has a huge potential for policymaking, it also attracts legitimacy and practicability concerns. *Nudge and the Law* takes a European perspective on those issues and explores the legal implications of the emergent phenomenon of behavioural regulation

by focusing on the challenges and opportunities it may offer to EU policy-making and beyond.

The Nigerian state has been oil-rich for decades, and yet perennially incapable of converting its oil resources into wealth for ordinary Nigerians. Adeoye O. Akinola tackles this “ vexed ” oil question by examining the political economy of efforts to deregulate the Nigerian downstream oil industry. Focusing on themes of globalization and democratization, this book considers how a resource-rich developing country like Nigeria can exploit the opportunities of globalization and navigate the pressures of democratization and the challenges of liberalization. Pairing sophisticated theoretical frameworks with firsthand accounts from actors in the oil industry, this book identifies the root causes of Nigeria ’ s development struggles and offers practical policy solutions for successfully deregulating the oil sector. For public officials and policymakers as well as researchers, this book offers a critical new lens on the future of natural resource management in Nigeria and the Global South.

The aim of this book is to document for the first time the dimensions and requirements of effective integrated groundwater management (IGM). Groundwater management is a formidable challenge, one that remains one of humanity ’ s foremost priorities. It has become a largely non-renewable resource that is overexploited in many parts of the world. In the 21st century, the issue moves from how to simply obtain the water we need to how we manage it sustainably for future generations, future economies, and future ecosystems. The focus then becomes one of understanding the drivers and current state of the groundwater resource, and restoring equilibrium to at-risk aquifers. Many interrelated dimensions, however, come to bear when trying to manage groundwater effectively. An integrated approach to groundwater necessarily involves many factors beyond the aquifer itself, such as surface water, water use, water quality, and ecohydrology. Moreover, the science by itself can only define the fundamental

bounds of what is possible; effective IGM must also engage the wider community of stakeholders to develop and support policy and other socioeconomic tools needed to realize effective IGM. In order to demonstrate IGM, this book covers theory and principles, embracing: 1) an overview of the dimensions and requirements of groundwater management from an international perspective; 2) the scale of groundwater issues internationally and its links with other sectors, principally energy and climate change; 3) groundwater governance with regard to principles, instruments and institutions available for IGM; 4) biophysical constraints and the capacity and role of hydroecological and hydrogeological science including water quality concerns; and 5) necessary tools including models, data infrastructures, decision support systems and the management of uncertainty. Examples of effective, and failed, IGM are given. Throughout, the importance of the socioeconomic context that connects all effective IGM is emphasized. Taken as a whole, this work relates the many facets of effective IGM, from the catchment to global perspective.

Deeper Insight into Nigeria's Public Administration is a collection of a wider range of Public Administration topics to which scholars and authors have devoted attention in recent time. Here is a lucidly written and presented book, which selective scholars, researchers and readers would find indispensably useful to procure for personal and institutional librarians.

The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts. We welcome manuscripts based on cutting-edge research from a wide variety of theoretical perspectives and methodological orientations. The editorial team is particularly interested in working with international authors, authors from traditionally marginalized populations, and in work that is relevant to practitioners around the world.
