~~Josephine Cobb has always done the best she could, and despite amazing odds against her, she has succeeded thus far. Now she has been charged with the nearly impossible task of rescuing Freddy and Samantha Ross from a drug cartel that has placed a million dollar bounty on her head. So while the Coachella Valley continues to flood, and emergency services fight to evacuate the residents, Jo and her friends must storm the Rabello compound and rescue Sam and Freddy. She must somehow survive the storms, serial killers and a lunatic with a vendetta who threatens to kill everyone in the valley. Even more dangerous than any of these facts are that Jo has growing feelings for the beautiful and tragic Amy Voss. Enjoy the none-stop action of book III of the Burn & Chaos series.~~

~~Kearney, Cheyenne, Rawlins. Reno, Sacramento, San Francisco. At each train station, a few lucky orphans from the crowded streets of New York City receive the fulfillment of their dreams: a home and family. This "orphan train" is the vision of Charles Loring Brace, founder of the Children's Aid Society, who cannot bear to see innocent children abandoned in the overpopulated cities of the mid-nineteenth-century. Yet it is not just the orphans whose lives need mending -- follow the train along and watch God's hand restore love and laughter to the right family at the right time!~~

~~A long-standing tradition of excellence is extended in the Fourth Edition of this authoritative introduction to the field of therapeutic recreation. The authors effectively combine a broad orientation to the profession with the practical information necessary for students to become successful practitioners. Part I contains a comprehensive discussion of the fields history and theoretical underpinnings, providing students with the perspective they need to evaluate the social, cultural, demographic, economic, and technical forces that have shaped and are continuing to impact health and human services in general, and therapeutic recreation in particular. Part II introduces students to the client populations served by therapeutic recreation specialists and describes specific approaches and activities employed by TR professionals to help clients achieve meaningful improvements in health status, functional capacities, and quality of life. The authors have retained the practical, student-oriented approach that makes this an ideal text for introductory courses. They address all content areas included in the NCTRC certification exam, are compatible with the American Psychiatric Association on psychological classifications, and incorporate the World Health Organizations international classification of functioning, disability, and health. The latest edition contains updated information on baby boomers, the obesity epidemic, and evidence-based practices; field-based photographs and illustrations; and study questions and exercises designed to engage students.~~
