The purpose of this book is to discover whether, and to what extent, methods of modern scholarship can become integrated into Torah study.

"Bowersock's fascinating lectures add much to the new perception of the early empire as a time of experiment and cultural cross-fertilization."—Averil Cameron, author of *Christianity and the Rhetoric of Empire* "An exhilarating exploration of the multicultural world of the Roman empire. . . . Did the Latin and Greek 'novels' (from the comic *Satyricon*, contemporary with Nero and Paul, onwards through the whole range of romantic narratives) with their exotic locations and dramatic incident, draw on Christian belief in resurrection and the Eucharist? . . . Bowersock dissects the body of the evidence with a skeptical scalpel and magically restores it intact and alive."—Susan Treggiari, author of *Roman Marriage: Iusti Coniuges from the Time of Cicero to the Time of Ulpian* "Conceived in admirably broad and imaginative terms and treated with erudition and boldness in equal parts. *Fiction as History*, controversial as some of its conclusions may seem, opens up a whole new vein in scholarship in this field, and shows that the ancient novel is worth the attention of not only literary scholars but historians as well. A much-needed book."—B. P. Reardon, editor of *Collected Ancient Greek Novels*

The third edition of the MLA's widely used *Introduction to Scholarship in Modern Languages and Literatures* features sixteen new essays by leading scholars. Designed to highlight relations among languages and forms of discourse, the volume is organized into three sections. "Understanding Language" provides an overview of the field of linguistics, with special attention to language acquisition and the social life of languages. "Forming Texts" offers tools for understanding how speakers and writers shape language; it examines scholarship in the distinct but interrelated fields of rhetoric, composition, and poetics. "Reading Literature and Culture" continues the work of the first two sections by introducing major areas of critical study. The nine essays in this section cover textual and historical scholarship; interpretation; comparative, cultural, and translation studies; and the interdisciplinary topics of gender, sexuality, race, and migrations (among others). As in previous volumes, an epilogue examines the role of the scholar in contemporary society. Each essay discusses the significance, underlying assumptions, and limits of an important field of inquiry; traces the historical development of its subject; introduces key terms; outlines modes of research now being pursued; postulates future developments; and provides a list of suggestions for further reading. This book will interest any member of the academic community seeking a review of recent scholarship, while it provides an indispensable resource for undergraduate and graduate students of modern languages and literatures.

This open access book covers comprehensive but fundamental principles and concepts of disaster and accident prevention and mitigation, countermeasures, and recovery from disasters or accidents including treatment and care of the victims. Safety and security problems in our society involve not only engineering but also social, legal, economic, cultural, and psychological issues. The enhancement needed for societal safety includes comprehensive activities of all aspects from precaution to recovery, not only of people but also of governments. In this context, the authors, members of the Faculty of Societal Safety Science, Kansai University, conducted many discussions and concluded that the major strategy is consistent independently of the type and magnitude of disaster or accident, being also the principle of the foundation of our faculty. The topics treated in this book are rather widely distributed but are well organized sequentially to provide a clear understanding of the principles of societal safety. In the first part the fundamental concepts of safety are discussed. The second part deals with risks in the societal and natural environment. Then follows, in the third part, a description of the quantitative estimation of risk and its assessment and management. The fourth part is devoted to disaster prevention, mitigation, and recovery systems. The final, fifth part presents a future perspective of societal safety science. Thorough reading of this introductory volume of societal safety science provides a clear image of the issues. This is largely because the Japanese have suffered often from natural disasters and not only have gained much valuable information about disasters but also have accumulated a store of experience. We are still in the process of reconstruction from the Great East Japan earthquake and the Fukushima nuclear power plant accident. This book is especially valuable therefore in studying the safety and security of people and their societies.

Equity in Early Modern Legal Scholarship offers a comprehensive account of the development of equity by legal writers in the early modern period, unearthing a time of lively debate about its nature and function.
