The tragedy that occurred in the United States on September 11, 2001 brought enhanced emergency preparedness among first responders to the forefront of public awareness. Since those events and despite significant progress made in many of the areas previously deemed deficient some response areas are still woefully inadequate. Cross-Training for First Responders highlights these weaknesses that, in many cases, still remain in the response community. The book presents concrete solutions that arm first responders with vital knowledge so that they are better prepared in the event of another major incident. Innovative training The author demonstrates that the best way responders can prepare for, react to, and mitigate an incident is to require them to train outside their traditional responsibilities thereby developing an understanding of other first responder agencies' terms, methods, and operational procedures. Despite this enhanced situational training, communication gaps can occur during cross-response and across regions. The book explains the kind of training required to prevent a lack of situational awareness by those thrust into unfamiliar territory during crisis events or mass disasters. Other topics include ways to curtail the inherent tensions that arise between voluntary and career responders, how to turn conflicts between various responding agencies into collaboration, innovative training strategies, grant opportunities to pay for training and equipment, and the rising trend of on-line training courses. Testing readiness before an incident occurs Finally, the book covers mechanisms for testing first responders' ability to apply their new cross-training techniques, demonstrates how to plan and conduct a "tabletop" drill, and explains how to review the drill results to determine the areas in which participants are still deficient. By identifying problem areas and offering concrete solutions, this book enables first responders to harness every possible advantage so that they are prepared and ready to confront the next crisis, no matter where it may strike.

This guidance was developed in coordination with Federal, State, tribal, and local Public Information Officers (PIOs). The goal of this publication is to provide operational practices for performing PIO duties within the Incident Command System (ICS). It offers basic procedures to operate an effective Joint Information System (JIS). During an incident or planned event, coordinated and timely communication is critical to effectively help the community. Effective and accurate communication can save lives and property, and helps ensure credibility and public trust. This Basic Guidance for Public Information Officers provides fundamental guidance for any person or group delegated PIO responsibilities when informing the public is necessary. The guidance also addresses actions for preparedness, incident response, Joint Information Centers (JICs), incident recovery, and Federal public information support. The guidance material is adaptable to individual jurisdictions and specific incident conditions.

For fans of Gillian Flynn, Caroline Cooney, and R.L. Stine comes Who Are You? from four-time Edgar Allen Poe Young Adult Mystery Award winner Joan Lowery Nixon. Kristi Evans and her parents can't understand why police detectives are telling them that a man named Douglas Merson has been shot. They've never heard of him. But it becomes important when they learn that Mr. Merson has kept a secret file on Kristi for her entire life. Suddenly Kristi finds herself investigating who this man is and why he has intruded on her privacy. When Kristi goes to see Mr. Merson in the hospital, she discovers he is a professional artist; he even offers to help her pursue her own dream of being an artist. Kristi has always wanted someone with whom she could share her passion for art. Her parents not only don't understand it, they want her to do something more practical. Now this stranger seems to be offering Kristi the piece that has been missing from her life all along, but at what cost to her relationship to her parents? Who is this man who seems too good to be true? [A] fast-paced mystery [that] hook[s] and hold[s] readers until all is resolved at the finish. [Publishers Weekly] Appealing characters, an interesting scenario, and a fascinating peek into the big-money art world will keep the pages turning. [Booklist] Lots of action and Kristi is a likable heroine! A solid offering for mystery fans. [School Library Journal]

Course Overview On February 28, 2003, President Bush issued Homeland Security Presidential Directive-5. HSPD-5 directed the Secretary of Homeland Security to develop and administer a National Incident Management System (NIMS). NIMS provides a consistent nationwide template to enable all government, private-sector, and nongovernmental organizations to work together during domestic incidents. You can also find information about NIMS at <http://www.fema.gov/nims/> This course introduces NIMS and takes approximately three hours to complete. It explains the purpose, principles, key components and benefits of NIMS. The course also contains "Planning Activity" screens giving you an opportunity to complete some planning tasks during this course. The planning activity screens are printable so that you can use them after you complete the course. What will I be able to do when I finish this course? * Describe the key concepts and principles underlying NIMS. * Identify the benefits of using ICS as the national incident management model. * Describe when it is appropriate to institute an Area Command. * Describe when it is appropriate to institute a Multiagency Coordination System. * Describe the benefits of using a Joint Information System (JIS) for public information. * Identify the ways in which NIMS affects preparedness. * Describe how NIMS affects how resources are managed. * Describe the advantages of common communication and information management systems. * Explain how NIMS influences technology and technology systems. * Describe the purpose of the NIMS Integration Center CEUs: 0.3

The best decisions made by public managers are based not on instinct, but on an informed understanding of what's happening on the ground. Policy may be directed by ideology, but it must also be founded on reality. The challenge of making the right decisions as a public manager is often, therefore, based on the need for rigorous, actionable research. Now in a thoughtfully revised second edition, this textbook shows students of Public Administration exactly how to use both qualitative and quantitative research techniques to give them the best chance to make the right decisions. Uniquely, Eller, Gerber, and Robinson present research methodologies through a series of real-life case studies, with each chapter exploring situations where a public manager can use research to answer specific questions, demonstrating how that research can inform future policy. Taking readers through the key concepts, from research design and sampling to interviews, survey data, and more statistical-based approaches, this new edition provides a complete guide to using research in the public and voluntary sectors. New to this edition: To better orient the student, the second edition is thematically arranged. Five sections, each with a short essay, provide not only previews of the content of each section, but more importantly guide the reader through how the concepts and techniques covered relate to real-world use and application. A new chapter on applied quantitative analyses has been added to offer coverage of several commonly-used and valuable analytic techniques for decision making for policy and management: benefit-cost analysis, risk assessment, and forecasting. The second edition is accompanied by online materials containing suggested course plans and sample syllabi, PowerPoint lecture slides, and student support materials to illustrate the application of key concepts and analytic techniques. Each chapter also includes discussion questions, class exercises, end of chapter review questions, and key vocabulary to provide students with a range of further tools to apply research principles to practical situations.
