The Nissan Bluebird is a compact car with a model name introduced in 1957. It has been Nissan's most internationally recognized sedan, in multiple body styles, and is known for its dependability and durability. The Bluebird originated from Nissan's first vehicles, dating to the early 1900s, and its traditional competitor became the Toyota Corona. The Bluebird was positioned to compete with the ...

Nissan New Zealand assembled several versions of the Bluebird 910. These were shipped in CKD from Japan, including a top ZX model that was the first, and only, car to be assembled in the country with electrically adjustable Japanese domestic style 'hockey stick' rear view mirrors on the front guards (which had to be sent out after kit unpacking for a local specialist to stamp the mounting holes).

The Nissan Bluebird could be ordered as four-door sedan, as two-door hardtop-coupé and as five-door station wagon. The 1.6 and 2.0 four-cylinder gasoline engines, which offer driving performance typical for this class, were popular. With its poor 60 HP the 2.0 liters diesel engine is relatively cost-effective, but recommended for smart spenders.

Years of meticulous research have resulted in this unique history, technical appraisal (including tuning and motorsports) and data book of the Ford V8 Cleveland 335 engines produced in the USA, Canada and Australia, including input from the engineers involved in the design, development and subsequent manufacture

of this highly prized engine from its inception in 1968 until production ceased in 1982.

Toleman was the team that took Ayrton Senna into Formula 1, to which he responded by creating a masterpiece of movement at Monaco. This was the team that launched Derek Warwick. This was the team that brought Rory Byrne, Ferrari's design genius, to sudden prominence. This book presents the story of Toleman.

Researched in incredible detail, this book explores the story of the timeless VW bus, from early origins through to the present day. This entirely new edition includes details of many of the different camper conversions, and examines the social history and the T2's evolution. Including full specifications, production figures and Page 15/19

buying advice, this is a must for any VW enthusiast.

This totally revised, updated and enlarged book is THE complete guide to building a fast MG Midget or Austin-Healey Sprite for road or track. Daniel has been continuously developing his own 'Spridget' for years, and really does know what works and what doesn't when it comes to building a fast Midget or Sprite. Best of all, this book covers every aspect of the car, from the tyre contact patch to the rollover bar, and from radiator back to exhaust tailpipe. This new edition contains updated information for parts and suppliers, many new photos, and features new material covering aerodynamics, including results from testing the effect of modifications at the MIRA wind tunnel. With over 400 mainly colour photos and exclusive tuning advice, this is a MUST Page 16/19

for any Sprite or Midget owner.

This book is a trip down memory lane, recalling the days when Formula 5000 cars roared around the race tracks in Britain and Europe, creating a lot of noise and, occasionally, dust. The wail of a 5-litre engine was often more spine-tingling that ANY other racing car! Nowadays, many of the same cars show modern day spectators just what Formula 5000 was, back in the day. Few, if any, of the drivers are prima-donnas and many want to know what their car did before it came into their possession. This book answers those questions and many more.

Cars.

Nigel Bennett's unique autobiography describes his life and career, from growing-up influenced by car design, to his

Page 17/19

education and the building of his 750 specials. He describes his work as Firestone Development Manager, recounting many tales of the outstanding designers and drivers of the period. Detailing his work in Formula 1, as a Team Lotus engineer, and then as Team Ensign designer, he also covers his Indycar designs at Theodore, Lola Cars and Penske Cars. Life after his retirement, his involvement in boat design and with modern F1 teams, are also recounted.

Lasting six weeks, and covering 16,000 miles from London to Mexico City via some of the most varying, tortuous and difficult terrain on three continents, the 1970 World Cup Rally was a unique high-speed event, attracting many serious works teams such as Ford and British Leyland. Despite the tremendous amounts of money spent choosing and developing new cars,

completing months-long route surveys, and analysing every detail of diets, oxygen provision, and the number of crew members, out of an entry of more than 100 cars, only 23 cars made it to the finish. It was then, and remains now, the toughest rally of all time.

Beginning with a look at the SL model's heritage, this book describes the full development and production history of a modern classic. Covering available models in all the major markets, year-by-year, and including limited editions, the data is supported by contemporary illustrations, sourced from the factory, plus in-depth appendices.
