Child abuse, neglect, or maltreatment and even intimate partner violence are all considered to be factors with negative effects for children. Neglect or maltreatment leads to many forms of abuse. Some of these are domestic violence, sexual abuse, and emotional abuse. These could impact a child's overall health if not treated early.

Classic Papers in Child Abuse provides a mini-library of timeless core research into interdependent aspects of dealing with child maltreatment. Each paper is accompanied by editors' commentaries and brief descriptive statements.

Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, *Understanding Child Abuse and Neglect*, which provided an overview of the research on child abuse and

neglect. New Directions in Child Abuse and Neglect Research updates the 1993 report and provides new recommendations to respond to this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. New Directions in Child Abuse and Neglect Research recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. New Directions in Child Abuse and Neglect Research identifies four areas to look to in developing a coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response.

In this absorbing story of how child abuse grew from a small, private-sector charity concern into a multimillion-dollar social welfare issue, Barbara Nelson provides important new perspectives on the process of public agenda setting. Using extensive personal interviews and detailed archival research, she reconstructs an invaluable history of child abuse policy in America. She shows how the mass media presented child abuse to the public, how government agencies acted and interacted, and how state and national legislatures were spurred to strong action on this issue. Nelson examines prevailing theories about agenda setting and introduces a new conceptual framework for understanding how a social issue

becomes part of the public agenda. This issue of child abuse, she argues, clearly reveals the scope and limitations of social change initiated through interest-group politics. Unfortunately, the process that transforms an issue into a popular cause, Nelson concludes, brings about programs that ultimately address only the symptoms and not the roots of such social problems.

Over forty contributors, including highly regarded researchers in the field, present the most recent findings on the impact of abuse and neglect on cognitive, linguistic, social and emotional development in children.

The purpose of the child maltreatment uniform definitions and recommended data elements is to present a definition of child maltreatment, its associated terms, and recommended data elements for voluntary use by individuals and organizations in the public health community. The definitions and data elements are intended to promote and improve consistency of child maltreatment surveillance for public health practices. It is designed to be used by state and local health department staff to assist in and provide a framework for the collection of public health surveillance data on child maltreatment. The definitions included in the document draw upon definitions that are currently in use in the literature and were adapted in collaboration with a panel of experts on child maltreatment and public health surveillance. The definitions and data elements are designed be flexible tools for developing an ongoing surveillance system. Agencies that use the document can
