ACRP Report 78: "The original problem statement and objectives for ACRP 02-16 as developed by the project panel are restated as follows: 'Increased levels of demand at airports in the United States may result in a growth in airport GSE activity and an associated increase in airport surface emissions. Local air quality and global climate change concerns, regulatory pressures, and the desire to be environmentally responsible have resulted in a growing number of airport programs around the United States looking to assess and reduce airport emissions. Although much is known about aircraft fleets, operations, and emissions, comparatively little is known about GSE. The available GSE data are outdated, unreliable, and limited. Accurate GSE data are needed by the FAA and airport sponsors to plan adequately and to balance the growing demands of air travel with air quality concerns. Proactive strategies that reduce surface emissions may help airports address air quality concerns. As such, research is needed to obtain additional information on GSE equipment and to identify programs and best practices that could reduce GSE emissions for GSE owners, operators, and airports.' In response to this problem statement, the primary objectives of this research were to (1) develop a tutorial that describes GSE operations and identifies potential strategies to reduce emissions

from powered GSE for use by GSE owners and operators and (2) conduct a representative inventory of powered GSE at airports to help the industry assess the contribution of GSE to air quality impacts at airports. ." --from p. 1.

commercial entity to becoming a political system for social change, a survival mechanism for independent journalists to reach out to diverse audiences, and gain back the public trust. Bringing a fresh perspective to recent studies on cultures of transmediality along with an in-depth analysis of three contemporary Turkish cases, the book: Builds upon questions of whether transmedia storytelling can offer a support system to construct an alternative news media world in a political context such as Turkey's Examines how transmedia storytelling can reach places the mainstream news media can't control Explores whether transmedia storytelling can sustain the survival of an independent journalist in Turkey's political context Looking beyond the case of Turkey, this study will be an important addition to the literature on rethinking journalistic form and practice, teaching transmedia strategies, and social communication. It will be of great benefit to students and scholars of journalism studies, transmedia studies, and media and communication studies.

Accidental Sailor Girl is a story about a young girl named Kourtney and her journey from starting out with only her car and a surfboard to sailing across the Atlantic on a Gaff Rigged Cutter with a Square Sail named Norna. The story moves from her hardships of living on the beach to buying her first sailboat, a 27 foot Hunter she named "Happy." Her attitude toward learning how to sail and how to fix up her boat led her to meet Pete Grundvig, a local carpenter and shipwright, the owner of Norna. Their relationship with surfing, sailing, and music, moved them to the tune of a two year Atlantic Circumnavigation. Kourtney soon realizes she is not the same person she was when she left home two years before.

'Etchells writes eloquently ... A heartfelt defence of a demonised pastime' The Times 'Once in an age, a piece of culture comes along that feels like it was specifically created for you, the beats and words and ideas are there because it is your life the creator is describing. Lost In A Good Game is exactly that. It will touch your heart and mind. And even if Bowser, Chun-li or Q-Bert weren't crucial parts of your youth, this is a flawless victory for everyone' Adam Rutherford When Pete Etchells was 14, his father died from motor neurone disease. In order to cope, he immersed himself in a virtual world - first as an escape, but later to try to understand what had happened. Etchells is now a researcher into the psychological effects of video games, and was co-author on a recent paper explaining why WHO plans to classify 'game addiction' as a danger to public health are based on bad science and (he thinks) are a bad idea. In this, his first book, he journeys through the history and development of video games - from Turing's chess machine to mass multiplayer online games like World of Warcraft- via scientific study, to investigate the highs and lows of playing and get to the bottom of our relationship with games - why we do it, and what they really mean to us. At the same time, Lost in a Good Game is a very unusual memoir of a writer coming to terms with his grief via virtual worlds, as he tries to work out what area of popular culture we should classify games (a relatively new technology) under.
