Outlining the main methods and techniques available to ornithologists, this book brings together in one authoritative source contributions containing information on avian ecology and conservation.

Capitalism could not exist without the coins, banknotes, documents, information graphics, interfaces, branding, and advertisements made by graphic designers. Even anti-consumerist strategies such as social design and speculative design are appropriated to serve economic growth. It seems design is locked in a cycle of exploitation and extraction, furthering inequality and environmental collapse. CAPS LOCK uses clear language and visual examples to show how graphic design and capitalism are inextricably linked. The book features designed objects and also examines how the study, work, and professional practice of designers support the market economy. Six radical design cooperatives are featured that resist capitalist thinking in their own way, hoping to inspire a more socially aware graphic design.

This volume of the Thinker 's Guide Library addresses the vital role of questions in every area of life. As readers develop a questioning mind, they also come to a better understanding of the world and of themselves. This book illustrates how well developed questions lead to deeper knowledge and counteract dangerous ignorance.

It takes many years to excel at recording, and if your goal is to become an engineer then that's what's required. But if you're a musician who wants to garner a reaction to your song, then you don't have time for that. You need to make a Killer Record right now. But how? First, stop thinking like a recordist. The stated goal of this book is to convert recording decisions into musical ones, and technical decisions into practical ones. Not only do I explain the musical strategies for making a Killer Record, I also break the technical information down to its core so that you can strategize based on your recording reality. So long as you have what you need to make a record, I can help you make it a Killer Record. This is the only gear you'll need. Who am I? I'm Mixerman, a gold and multi-platinum award winning producer, mixer, and recordist. I'm also a published author, and I have a number of very popular books written on the recording arts. I was in precisely your position at the early stages of my career. I was a musician, frustrated that I could write a good song, only to feel the record itself fell short of it's potential. Over the course of my decades recording, I noticed that the performance and arrangement had a far greater impact on the sound than anything I did on the engineering side. This field manual is chock full of recording, mixing, and producing strategies designed to keep recording a fun and focused process. You will return to this manual time and time again to help you overcome any impediment-technical or musical-that might prevent you from achieving the results you seek, regardless of your recording environment, regardless of what equipment you're using, and regardless of your current skillset. You can make a Killer Record under nearly any circumstance. It just requires the right mindset.
